PROFESSIONAL SUMMARY

Business Information Technology (BIT) student at the University of Jordan blending technical expertise with creative storytelling. Passionate about developing interactive, scalable web applications and intuitive user interfaces. Alongside my technical background, I am an active filmmaker and screenwriter currently working on independent cinematic projects, bringing a unique, narrative-driven approach to digital design and user experience.

TECHNICAL SKILLS

Frontend Technologies: React.js, JavaScript, HTML5, CSS3, Context API, Recharts

Backend & Database: Firebase (Firestore, Hosting, Architecture)

Tools & Platforms: Git/GitHub, Vercel, VS Code, Google reCAPTCHA, Image Processing APIs

KEY PROJECTSJU Debate Club Platform (React, Firebase)

Developed a complete, interactive web platform for the University of Jordan Debate Club.

Integrated Firebase Firestore for seamless data management and Google reCAPTCHA for secure form submissions.

Engineered frontend fallback mechanisms to ensure high availability during external API failures.

Nabil Lab System (React, Firebase)

Designed and built a laboratory information system to streamline internal operations and data entry.

Connected the frontend to Firebase Firestore for real-time database synchronization and efficient record management.

Field Notes Diary (React)

Created a personal digital scrapbook web application with advanced browser-based functionalities.

Implemented local storage capabilities, Polaroid-style image rendering, client-side image compression, and custom PDF export features.

ADDITIONAL EXPERIENCE

Filmmaking & Screenwriting: Certified in screenwriting and filmmaking by the New York Film Academy. Currently developing independent cinematic projects and feature screenplays (e.g., "Peace Seeker").

EDUCATION & LANGUAGES

University of Jordan: Bachelor's Degree in Business Information Technology (BIT)

Languages: Arabic (Native) | English (Advanced - C1.1)
